

Fazliddin Abdurahimov

FULL-STACK WEB DEVELOPER

Profile

Dynamic Full-Stack Web Developer with a strong foundation in both frontend and backend technologies, poised to elevate software solutions. With extensive experience in crafting high-performance applications, notable achievements include independently developing a complete e-commerce platform and optimizing API performance for enhanced scalability. Proficient in a range of technologies such as Python, React, and PostgreSQL, alongside a commitment to continuous learning and adaptation to emerging tech. Passionate about tackling complex challenges and contributing to innovative projects that drive business success. Eager to embrace new opportunities that foster growth and mastery in software development.

Employment History

Full-Stack Web Developer, None

FEBRUARY 2024 – JANUARY 2025

In the role of Full-Stack Web Developer, responsibilities include creating and maintaining dynamic web applications that provide excellent user experiences. This position demands proficiency in both frontend and backend technologies, allowing for the development of cohesive and functional applications. The focus has been on utilizing frameworks such as React, Next.js, and Django alongside databases like PostgreSQL and MySQL to deliver high-performance solutions.

- Developed a comprehensive full-stack e-commerce platform independently, encompassing both backend and frontend aspects.
- Designed and implemented an interactive sidebar and pagination system using React, significantly enhancing user experience.
- Refactored key API functions to optimize performance, resulting in improved response times and scalability.
- Managed PostgreSQL databases effectively, utilizing PgBouncer and optimizing SQLAlchemy queries for better efficiency.
- Established robust authentication, logging, and error handling mechanisms to ensure application security and maintainability.
